Summary Section

Investment Objective

- The Walthausen Select Value Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund

The following table describes the expenses and fees that you may pay if you buy and hold shares of the Fund.

	R6 Class
Shareholder Fees (fees paid directly from your investment)	
Sales Charge (Load) Imposed on Purchases	None
Deferred Sales Charge (Load)	None
Sales Charge (Load) Imposed on Reinvested Dividends	None
REDEMPTION FEES (as a percentage of the amount redeemed) On shares sold after holding them for 90 days or less.	 2.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.90%
Distribution 12b-1 Fees	0.00%
Other Expenses	0.45%
Acquired Fund Fees and Expenses	<u>0.01%</u>
Total Annual Fund Operating Expenses	1.36%
Fee Waiver / Expense Reimbursement ⁽¹⁾	<u>(0.37%)</u>
Total Annual Fund Operating Expenses After Fee Waiver ⁽²⁾	0.99%

⁽¹⁾ The Advisor has contractually agreed to waive Services Agreement fees to the extent necessary to maintain total annual operating expenses of the R6 Class Shares, excluding brokerage fees and commissions, taxes, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), the cost of acquired funds and extraordinary expenses at 0.98% of its average daily net assets through May 31, 2019. The Advisor may not terminate the fee waiver before May 31, 2019. The Trustees may terminate the expense waiver upon notice to the Advisor.

⁽²⁾ The Total Annual Fund Operating Expenses before and after fee waivers in this fee table will not correlate to the expense ratios in the Fund's financial statements (or the financial highlights in this Prospectus) because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investing in Acquired Funds. Excluding the indirect costs of investing in Acquired Funds, Total Annual Fund Operating Expenses After Fee Waiver would be 0.98% for the R6 Class Shares.

Expense Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% annual return each year and that the Fund's operating expenses remain the same each year. The one year expense example includes the effect of the fee waiver. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Walthausen Select Value Fund	One Year	Three Years	Five Years	Ten Years
R6 Class	\$101	\$394	\$709	\$1,603

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 63.12% of the average value of its portfolio.

The Principal Investment Strategy of the Fund

The Fund invests primarily in common stocks of small and mid capitalization companies that the Advisor believes have the potential for capital appreciation. Small and mid capitalization companies are defined by the Advisor as those with market capitalizations of \$7 billion or less at the time of purchase. The Fund typically invests in 40 to 50 companies. Under normal circumstances, the Fund will invest at least 80% of its net assets in U.S. common stocks of small and mid capitalization companies, as defined above. The Fund emphasizes a “value” investment style, investing in companies that appear under-priced according to certain financial measurements of their worth or business prospects. Financial measures which are used to assess value are Price to Book ratio and Enterprise Value to EBITDA ratio compared to valuations which prevail in the market and in comparable securities. The Advisor defines Enterprise Value as the market value of a company’s equity, debt and unfunded pension claims, less cash. EBITDA is a company’s earnings before interest, taxes, depreciation and amortization.

The Advisor may sell a company when the company reaches the Advisor’s appraised value, when there is a more attractively priced company as an alternative, when the fundamentals of the business have changed, or when the Advisor determines that management of the company is not enhancing shareholder value. These portfolio reviews are conducted continuously through close monitoring of stock prices, changes in the economy, and corporate developments.

The Principal Risks of Investing in the Fund

As with all mutual funds, there is the risk that you could lose some or all of your investment in the Fund.

Risks of Investing in Small and Mid Capitalization Companies

The Fund invests in the stocks of small and mid capitalization companies, which may subject the Fund to additional risks. The earnings and prospects of these companies are generally more volatile than larger companies and small and mid capitalization companies may experience higher failure rates than do larger companies.

Risks in General

Domestic economic growth and market conditions, interest rate levels, and political events are among the factors affecting the securities markets in which the Fund invests. There is risk that these and other factors may adversely affect the Fund’s performance.

Risks of Investing in Common Stocks

Overall stock market risks may affect the value of the Fund. Factors such as domestic economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund’s investments goes down, your investment in the Fund decreases in value and you could lose money.

Value Investing Risk

Value investing attempts to identify companies selling at a discount to their intrinsic value. Value investing is subject to the risk that a company’s intrinsic value may never be fully realized by the market or that a company judged by the Advisor to be undervalued may actually be appropriately priced.

Sector Risk

Sector risk is the possibility that all stocks within the same group of industries will decline in price due to sector-specific market or economic developments. The Fund may be overweight in certain sectors at various times.

Investment Management Risk

The Advisor's strategy may fail to produce the intended results.

Performance

The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Institutional Class shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's Institutional Class shares over time to the performance of a broad-based market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Returns and performance below are for the Institutional Class shares. Because the Institutional Class has higher expenses than the R6 Class, its performance typically would have been lower than that of the R6 Class. Updated performance information is available on the Fund's website at www.walthausen-funds.com or by calling 1-888-925-8428.

The year-to-date return as of March 31, 2018 was -1.34% for the Institutional Class.

Best Quarter (December 31, 2011) +16.35% Worst Quarter (September 30, 2011) -20.00%

AVERAGE ANNUAL TOTAL RETURN FOR THE PERIODS ENDED 12/31/17	1 Year	5 Years	Since Inception (12/27/2010)
WALTHAUSEN SELECT VALUE FUND			
Institutional Class Return Before Taxes	17.51%	12.68%	11.40%
Return After Taxes on Distributions	17.27%	11.93%	10.77%
Return After Taxes on Distributions and Sale of Fund Shares	10.11%	9.82%	9.02%
Russell 2500 Value Index (does not reflect deductions for fees, expenses or taxes)	10.36%	13.27%	11.49%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Management

Investment Advisor

Walthausen & Co., LLC (the "Advisor")

Portfolio Managers

John B. Walthausen has managed the Fund since its inception in December 2010. Mr. Walthausen is the Chief Investment Officer of the Advisor. Gerard S.E. Heffernan has co-managed the Fund since March 2018. Mr. Heffernan is a portfolio manager for the Advisor.

Purchase and Sale of Fund Shares

The minimum initial and subsequent investment amounts for various types of accounts offered by the Fund are shown below.

R6 Class The Fund does not impose a minimum purchase requirement for the R6 Class shares, however, your financial intermediary, selling broker-dealer, plan administrator or third-party record keeper may impose minimum investment requirements. R6 Class shares are generally only available to qualified retirement plans.

Investors may purchase or redeem Fund shares on any business day through a financial intermediary. Please refer to your financial intermediary's procedures for purchasing and redeeming shares.

Tax Information

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a financial advisor), the Fund and/or its investment adviser may pay the intermediary a fee as compensation for the services it provides. These payments may create a conflict of interest by influencing the financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Advisor, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

Investment Objective, Principal Investment Strategy, Related Risks, and Disclosure of Portfolio Holdings

Investment Objective

- The Walthausen Select Value Fund seeks long-term capital appreciation.

The Principal Investment Strategy of the Fund

The Fund invests primarily in common stocks of small and mid capitalization companies that the Advisor believes have the potential for capital appreciation. Small and mid capitalization companies are defined by the Advisor as those with market capitalizations of \$7 billion or less at the time of purchase. The Fund typically invests in 40 to 50 companies. Under normal circumstances, the Fund will invest at least 80% of its net assets in U.S. common stocks of small and mid capitalization companies, as defined above. The Fund emphasizes a "value" investment style, investing in companies that appear under-priced according to certain financial measurements of their worth or business prospects. Financial measures which are used to assess value are Price to Book ratio and Enterprise Value to EBITDA ratio compared to valuations which prevail in the market and in comparable securities. The Advisor defines Enterprise Value as the market value of a company's equity, debt and unfunded pension claims, less cash. EBITDA is a company's earnings before interest, taxes, depreciation and amortization. The Fund may invest in other securities as described in the Statement of Additional Information, which is available upon request.

The Investment Selection Process Used by the Fund

Walthausen & Co., LLC, the Fund's advisor, searches for securities by using a proprietary valuation model to identify companies that are trading at a discount to intrinsic value. Once investment ideas meet screening criteria, the Advisor studies public filings and constructs detailed models to project earnings and cash flows. The Advisor frequently contacts company management and/or industry experts to develop a clearer understanding of each investment idea. Final investment decisions are based on the Advisor's internally prepared models and valuation metrics.

The Advisor may sell a security when it reaches the Advisor's appraised value, when there is a more attractively priced company as an alternative, when the fundamentals of the business have changed, or when the Advisor determines that management of the company is not enhancing shareholder value. These portfolio reviews are conducted continuously through close monitoring of stock prices, changes in the economy, and corporate developments.

For temporary defensive purposes, the Fund may hold cash or cash-equivalents and invest without limit in obligations of the U.S. Government and its agencies, money market funds and money market securities, including high-grade commercial paper, certificates of deposit, repurchase agreements and short-term debt securities. Under these circumstances, the Fund may not participate in stock market advances or declines to the same extent it would had it remained more fully invested in common stocks.

The Principal Risks of Investing in the Fund

As with all mutual funds, there is the risk that you could lose some or all of your investment in the Fund.

Risks of Investing in Small and Mid Capitalization Companies

The Fund invests in the stocks of small and mid capitalization companies, which may subject the Fund to additional risks. The earnings and prospects of these companies are generally more volatile than larger companies. Small and mid capitalization companies may experience higher failure rates than do larger companies. The trading volume of securities of small and mid capitalization companies is normally less than that of larger companies and, therefore, may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies. Small and mid capitalization companies may have limited markets, product lines or financial resources and may lack management experience.

Risks in General

An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Domestic economic growth and market conditions, interest rate levels, and political events are among the factors affecting the securities markets of the Fund's investments. There is risk that these and other factors may adversely affect the Fund's performance. You should consider your own investment goals, time horizon, and risk tolerance before investing in the Fund. An investment in the Fund may not be appropriate for all investors and is not intended to be a complete investment program. You may lose money by investing in the Fund.

Risks of Investing in Common Stocks

The Fund invests primarily in common stocks, which subjects the Fund and its shareholders to the risks associated with common stock investing. These risks include the financial risk of selecting individual companies that do not perform as anticipated, the risk that the stock markets in which the Fund invests may experience periods of turbulence and instability, and the general risk that domestic and global economies may go through periods of decline and cyclical change. Many factors affect the performance of each company that the Fund invests in, including the strength of the company's management or the demand for its product or services. You should be aware that a company's share price may decline as a result of poor decisions made by management or lower demand for the company's products or services. In addition, a company's share price may also decline if its earnings or revenues fall short of expectations.

There are overall stock market risks that may also affect the value of the Fund. Over time, the stock markets tend to move in cycles, with periods when stock prices rise generally and periods when stock prices decline generally. The value of the Fund's investments may increase or decrease more than the stock markets in general.

Value Investing Risk

Value investing attempts to identify companies selling at a discount to their intrinsic value. Value investing is subject to the risk that a company's intrinsic value may never be fully realized by the market or that a company judged by the adviser to be undervalued may actually be appropriately priced.

Sector Risk

Sector risk is the possibility that stocks within the same group of industries will decline in price due to sector-specific market or economic developments. If the Advisor invests a significant portion of its assets in a particular sector, the Fund is subject to the risk that companies in the same sector are likely to react similarly to legislative or regulatory changes, adverse market conditions and/or increased competition affecting that market segment. The sectors in which the Fund may be overweighted will vary.

Investment Management Risk

The Advisor's strategy may fail to produce the intended results.

Portfolio Holdings Disclosure

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information ("SAI").

Management

The Investment Advisor

Walthausen & Co., LLC, 2691 Route 9, Suite 102, Malta, NY 12020, is the investment advisor of the Fund and has responsibility for the management of the Fund's affairs, under the supervision of the Fund's Board of Trustees. The Fund's investment portfolio is co-managed on a day-to-day basis by John B. Walthausen and Gerard S.E. Heffernan. Mr. Walthausen founded the Advisor in 2007 and is a managing director of the Advisor. Mr. Walthausen is the Chief Investment Officer of the Advisor. Mr. Walthausen has managed the Fund since its inception. Mr. Walthausen's formal education includes a BA from Kenyon College and a MBA from New York University. Mr. Heffernan joined the Advisor in February 2018. His involvement in the investment industry spans over 25 years, including 15 years at Lord Abbett & Co., where he was a partner and portfolio manager specializing in small cap value equities. From June 2013 until February 2018, he was self-employed managing his own portfolio. Mr. Heffernan received a B.S. in Business Administration from Villanova University.

The Fund's Statement of Additional Information provides information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of Fund shares. A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement between the Fund and the Advisor is available in the Annual Report to Shareholders for the fiscal year ended January 31, 2018.

Under the Management Agreement, the Advisor, at its own expense and without reimbursement from the Trust, furnishes office space and all necessary office facilities, equipment and executive personnel necessary for managing the assets of the Fund. For the fiscal year ended January 31, 2018, the Advisor received an investment management fee at an annual rate equal to 0.90% of the average daily net assets of the Fund. Effective November 1, 2016 the Advisor permanently lowered its investment management fee to an annual rate equal to 0.90% of the Fund's average daily net assets. Under a Services Agreement with the Fund, the Advisor receives an additional fee of 0.45% of the Fund's average daily net assets up to \$100 million, 0.25% of the Fund's average daily net assets between \$100 million and \$500 million, and 0.15% of such assets in excess of \$500 million and is obligated to pay the operating expenses of the Fund excluding management fees, brokerage fees and commissions, taxes, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), the cost of acquired funds and extraordinary expenses. The Advisor has contractually agreed to waive Services Agreement fees to the extent necessary to maintain total annual operating expenses of the R6 Class Shares, excluding brokerage fees and commissions, taxes, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), the cost of acquired funds and extraordinary expenses at 0.98% of its average daily net assets through May 31, 2019. The Advisor may not terminate the fee waiver before May 31, 2019.

The Advisor (not the Fund) may pay certain financial institutions (which may include banks, brokers, securities dealers and other industry professionals) a fee for providing distribution related services and/or for performing certain administrative servicing functions for Fund shareholders to the extent these institutions are allowed to do so by applicable statute, rule or regulation. The Fund may purchase securities issued by these financial institutions or their affiliates, however, the portfolio manager is prohibited from considering the services provided by the financial institution in making a decision whether to purchase or sell the securities of the financial institution or its affiliates.

An investment in the Fund is not a deposit or obligation of any bank, is not endorsed or guaranteed by any bank, and is not insured by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency. You may lose money by investing in the Fund.

Shareholder Information

Pricing of Fund Shares

The price you pay for a share of the Fund, and the price you receive upon selling or redeeming a share of the Fund, is called the Fund's net asset value ("NAV"). A separate NAV is calculated for each share class of the Fund. The NAV for a class is calculated by adding the total value of the Fund's investments and other assets allocable to a class, subtracting the liabilities allocable to that class and then dividing that figure by the number of outstanding shares of the class:

$$\text{Net Asset Value} = \frac{\text{Total Assets (Class)} - \text{Liabilities (Class)}}{\text{Number of Shares Outstanding (Class)}}$$

The NAV is generally calculated on each day the New York Stock Exchange is open as of the close of trading on the Exchange (normally 4:00 p.m. Eastern time). The New York Stock Exchange is generally open every day other than weekends and holidays. All purchases, redemptions or reinvestments of Fund shares will be priced at the next NAV calculated after your order is received in proper form by the Fund's Transfer Agent, Ultimus Fund Solutions. If you purchase shares directly from the Fund, your order must be placed with the Transfer Agent prior to the close of the trading of the New York Stock Exchange in order to be confirmed for that day's NAV. The Fund's assets generally are valued at their market value. Certain short-term securities are valued at amortized cost, which approximates market value. If market prices are not available or, in the Advisor's opinion, market prices do not reflect fair value, or if an event occurs after the close of trading (but prior to the time the NAV is calculated) that materially affects fair value, the Advisor may value the Fund's assets at their fair value according to written policies approved by the Fund's Board of Trustees. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Advisor may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short term traders could take advantage of the arbitrage opportunity and dilute the NAV of long term investors. Fair valuation of a Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The Fund may use pricing services to determine market value.

Customer Identification Program

IMPORTANT INFORMATION ABOUT PROCEDURES FOR OPENING A NEW ACCOUNT THROUGH YOUR FINANCIAL INTERMEDIARY

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. This means that (through your financial intermediary), when you open an account, we will ask for your name, address, date of birth, and other information that will allow us to identify you. We may also ask for identifying documents, and may take additional steps to verify your identity. We may not be able to open an account or complete a transaction for you until we are able to verify your identity.

Investments Made Through Brokerage Firms or Other Financial Institutions

If you invest through a brokerage firm or other financial institution, the policies and fees may be different than those described here. Financial advisers, financial supermarkets, brokerage firms, and other financial institutions may charge transaction and other fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your financial institution if you have any questions. The Fund is deemed to have received your order when the brokerage firm

or financial institution receives the order, and your purchase will be priced at the next calculated NAV. Your financial institution is responsible for transmitting your order in a timely manner.

Minimum Investments

R6 Class The Fund does not impose a minimum purchase requirement for the R6 Class shares, however, your financial intermediary, selling broker-dealer, plan administrator or third-party record keeper may impose minimum investment requirements. R6 Class shares are generally only available to qualified retirement plans.

The Fund reserves the right to change the amount of these minimums from time to time. Investment minimums may be higher or lower to investors purchasing shares through a brokerage firm or other financial institution.

Instructions For Selling Fund Shares

You may sell all or part of your shares on any day that the New York Stock Exchange is open for trading. Your shares will be sold at the next NAV per share calculated after your order is received in proper form by the transfer agent. The proceeds of your sale may be more or less than the purchase price of your shares, depending on the market value of the Fund's securities at the time of your sale. Your order will be processed promptly and you will generally receive the proceeds within seven days after the Fund receives your properly completed request. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of fund shares, from the sale of portfolio securities, and then from borrowing from a bank line of credit. These redemption payment methods will be used in regular and stressed market conditions. Please refer to your financial intermediary's procedures for sell your Fund shares.

Dividends and Distributions

The Fund intends to pay distributions on an annual basis and expects that distributions will consist primarily of capital gains. You may elect to reinvest income dividends and capital gain distributions in the form of additional shares of the Fund or receive these distributions in cash. Dividends and distributions from the Fund are automatically reinvested in the Fund, unless you elect to have dividends paid in cash. Reinvested dividends and distributions receive the same tax treatment as those paid in cash.

Share Classes

R6 Class

R6 Class shares of the Fund are sold at NAV and are not subject to 12b-1 distribution fees. The Fund does not impose a minimum purchase requirement for the R6 Class shares, however, your financial intermediary, selling broker-dealer, plan administrator or third-party record keeper may impose minimum investment requirements.

R6 Class shares are generally only available through financial intermediaries, such as banks, brokerage firms, retirement plan administrators, and financial advisers for purchases by 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans and non-qualified deferred compensation plans where shares are held on the books of a Fund through omnibus accounts (either at the plan level or at the level of the investment provider). Contact your financial intermediary for eligibility.

R6 Class shares generally are not available to retail non-retirement accounts, traditional and Roth IRAs, Coverdell Education Savings accounts, owner-only 401(k)s, SEP IRAs, SARSEPs, SIMPLE IRAs, individual 403(b) and 457(b) plans and 529 accounts.

The Fund reserve the right to modify or waive the above policies at any time.

Plan participants who are considering an investment in the Fund should contact their employer, retirement plan administrator, or service agent that provides shareholder servicing, record keeping, account maintenance or other services for their retirement plan for details about the funds that are available under their retirement plan and the procedures for buying and selling shares. Plan sponsors, plan fiduciaries and other financial intermediaries may choose to impose qualification requirements for plans that differ from the Fund's share class eligibility standards and may charge fees that are in addition to those described in this prospectus.

The Fund offers other share classes, which have higher investment minimums and higher fees, through a separate prospectus.

Market Timing

The Fund discourages market timing. Market timing is an investment strategy using frequent purchases, redemptions and/or exchanges in an attempt to profit from short term market movements. Market timing may result in dilution of the value of Fund shares held by long term shareholders, disrupt portfolio management and increase Fund expenses for all shareholders. To discourage large and frequent short-term trades by investors, and to compensate the Fund for costs that may be imposed by such trades, the Fund imposes a redemption fee of 2.00% of the total redemption amount (calculated at market value) if you sell or exchange your shares after holding them for 90 days or less. The redemption fee is paid directly to the Fund and is designed to offset brokerage commissions, market impact, or other costs that may be associated with short-term trading.

The following types of redemptions and exchanges are exempt from the redemption fee:

- Redemption of shares purchased through Plan participant payroll or employer contributions;
- Redemption of shares purchased through reinvestment of dividends or capital gain distributions;
- Exchanges within the Walthausen Funds;
- Redemptions in connection with asset allocation program re-balancing through financial intermediaries, such as banks, brokerage firms, retirement plan administrators, and financial advisers, 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans and non-qualified deferred compensation plans; wrap-fee accounts and similar types of accounts or programs; and certain types of 401(k) or other retirement accounts that provide default investment options;
- Redemptions following the death of a shareholder or the settler of a living trust that is the registered shareholder of an account, for shares held in the account at the time of death.

The Board of Trustees also has adopted a policy directing the Fund to reject any purchase order with respect to one investor, a related group of investors or their agent(s), where it detects a pattern of purchases and sales of the Fund that indicates market timing or trading that it determines is abusive. This policy applies uniformly to all Fund shareholders. While the Fund attempts to deter market timing, there is no assurance that it will be able to identify and eliminate all market timers. For example, certain accounts called "omnibus accounts" include multiple shareholders. Omnibus accounts typically provide the Fund with a net purchase or redemption request on any given day where purchasers of Fund shares and redeemers of Fund shares are netted against one another and the identity of individual purchasers and redeemers whose orders are aggregated are not known by the Fund. The netting effect often makes it more difficult for the Fund to detect market timing, and there can be no assurance that the Fund will be able to do so. The Fund may invest in foreign securities, and small to mid capitalization companies, and therefore may have additional risks associated with market timing. Because the Fund may invest in securities that are, among other things, priced on foreign exchanges, thinly traded, traded infrequently or relatively illiquid, the Fund has the risk that the current market price for the securities may not accurately reflect current market values. This can create opportunities for market timing by shareholders. For example, securities trading on overseas markets present time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas market, but prior to the close of the U.S. market. A shareholder may seek to engage in short-term trading to take advantage of these pricing differences, and therefore could dilute the value of Fund shares held by long term shareholders, disrupt portfolio management and increase Fund expenses for all shareholders.

Taxes

Fund dividends and distributions are taxable to most investors (unless your investment is in an IRA or other tax-advantaged account). Dividends paid by the Fund out of net ordinary income and distributions of net short-term capital gains are taxable to the shareholders as ordinary income.

Distributions by the Fund of net long-term capital gains to shareholders are generally taxable to the shareholders at the applicable long-term capital gains rate, regardless of how long the shareholder has held shares of the Fund.

Redemptions of shares of the Fund are taxable events which you may realize as a gain or loss. The amount of the gain or loss and the rate of tax will depend mainly upon the amount paid for the shares, the amount received from the sale, and how long the shares were held.

The Fund's distributions may be subject to federal income tax whether received in cash or reinvested in additional shares. In addition to federal taxes, you may be subject to state and local taxes on distributions. For taxable years beginning after December 31, 2012, an additional 3.8% Medicare tax may be imposed on distributions you receive from the Fund and on gains from selling, redeeming or exchanging your shares.

Because everyone's tax situation is unique, always consult your tax professional about federal, state, and local tax consequences of an investment in the Fund.

PRIVACY POLICY

The following is a description of the Fund's policies regarding disclosure of nonpublic personal information that you provide to the Fund or that the Fund collects from other sources. In the event that you hold shares of the Fund through a broker-dealer or other financial intermediary, the privacy policy of your financial intermediary would govern how your nonpublic personal information would be shared with unaffiliated third parties.

Categories of Information the Fund Collects. The Fund collects the following nonpublic personal information about you:

- Information the Fund receives from you on or in applications or other forms, correspondence, or conversations (such as your name, address, phone number, social security number, assets, income and date of birth); and
- Information about your transactions with the Fund, its affiliates, or others (such as your account number and balance, payment history, parties to transactions, cost basis information, and other financial information).

Categories of Information the Fund Discloses. The Fund does not disclose any nonpublic personal information about their current or former shareholders to unaffiliated third parties, except as required or permitted by law. The Fund is permitted by law to disclose all of the information it collects, as described above, to its service providers (such as the Fund's custodian, administrator and transfer agent) to process your transactions and otherwise provide services to you.

Confidentiality and Security. The Fund restricts access to your nonpublic personal information to those persons who require such information to provide products or services to you. The Fund maintains physical, electronic, and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate you would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The financial information has been audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request.

Financial Highlights - R6 Class

Selected data for a share outstanding throughout the period:

	2/1/2017 to 1/31/2018	11/1/2016* to 1/31/2017
Net Asset Value -		
Beginning of Period	\$ 16.30	\$ 14.06
Net Investment Income (Loss) ^(a)	0.14	0.03
Net Gain (Loss) on Investments (Realized and Unrealized) ^(b)	3.01	2.24
Total from Investment Operations	3.15	2.27
Distributions (From Net Investment Income)	(0.11)	(0.03)
Distributions (From Capital Gains)	(0.05)	-
Total Distributions	(0.16)	(0.03)
Proceeds from Redemption Fee	-	-
Net Asset Value -		
End of Period	<u>\$ 19.29</u>	<u>\$ 16.30</u>
Total Return ^(c)	19.32%	16.18% **
Ratios/Supplemental Data		
Net Assets - End of Period (Thousands)	\$ 523	\$ 6
Before Reimbursement		
Ratio of Expenses to Average Net Assets	1.35%	1.35% ***
Ratio of Net Investment Income (Loss) to Average Net Assets	0.37%	0.48% ***
After Reimbursement		
Ratio of Expenses to Average Net Assets	0.98%	0.98% ***
Ratio of Net Investment Income (Loss) to Average Net Assets	0.74%	0.85% ***
Portfolio Turnover Rate	63.12%	62.38% **

* Commencement of Class.

** Not Annualized.

*** Annualized.

+ Amount less than \$0.005 per share.

(a) Per share amounts were calculated using the average shares method.

(b) Realized and unrealized gains and losses per share in this caption are balancing amounts necessary to reconcile the change in net asset value for the period and may not reconcile with the aggregate gains and losses in the Statement of Operations due to share transactions for the period.

(c) Total return represents the rate that the investor would have earned or lost on an investment in the Fund assuming reinvestment of dividends.

Where To Go For Information

For shareholder inquiries please, call toll-free in the U.S. at 1-888-925-8428. You will also find more information about the Fund on our website at www.walthausenfunds.com or in the following documents:

Statement of Additional Information

The Statement of Additional Information contains additional and more detailed information about the Fund, and is considered to be a part of this Prospectus. Additional information about the Fund's investments is available in the Fund's annual and semi-annual reports to shareholders. In the Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. **There are three ways to get a copy of these documents.**

1. Call or write for one, and a copy will be sent without charge.
